

# FLOWERING SEASONS OF AUSTRALIAN PLANTS.

No. II.

BY E. HAVILAND, F.L.S.

PLANTS FLOWERING IN THE NEIGHBOURHOOD OF SYDNEY DURING THE MONTH OF AUGUST, IN ADDITION TO THOSE ENUMERATED IN THE LIST FOR JULY, NEARLY ALL OF WHICH ARE STILL IN FLOWER.

As it is impossible for the author to visit more than a few localities during each month, these lists must necessarily, for the present, be very imperfect. Supplementary lists will, however, be added as each month recurs, until, it is hoped, the flowering seasons of at least the Cumberland plants have been ascertained. When sufficient data have been collected, a tabulated statement will be published, giving against each species its complete flowering season.

Ranunculaceæ—

*Clematis aristata.*

Dilleniaceæ—

*Hibbertia volubilis*

„ *dentata.*

Polygaleæ—

*Comesperma ericinum.*

Tremandreae—

*Tetralthea pilosa.*

Rutaceæ—

*Phebalium denticulatum.*

Euphorbiaceæ—

*Amperea spartioides*

*Poranthera microphylla.*

Leguminosæ—

*Gompholobium Huegelii*

*Pultenea echinulata*

*Acacia elongata*

*Bossiaea ensata*

*Indigofera australis*

*Oxylobium trilobatum.*

Crassulaceæ—

*Tillea purpurata.*

Myrtaceæ—

*Callistemon rigidus*

„ *linearis*

*Melaleuca ericifolia.*

Umbelliferae—	Epacrideae—
<i>Trachymene incisa</i>	<i>Epacris pulchella</i>
Proteaceae—	,, <i>purpurascens</i>
<i>Hakea acicularis</i>	<i>Brachyloma daphnoides</i>
<i>Conospermum longifolium</i>	<i>Leucopogon amplexicaulis</i>
var. <i>angustifolium.</i>	,, <i>esquamatus</i>
Compositae—	,, <i>lanceolatus</i>
<i>Gnaphalium Japonicum</i>	,, <i>biflorus.</i>
<i>Epaltes australis</i>	Orchideae—
<i>Senecio australis.</i>	<i>Diuris sulphurea</i>
Campanulaceae—	<i>Dendrobium speciosum</i>
<i>Lobelia gracilis</i>	,, <i>linguiforme</i>
,, <i>anceps</i>	<i>Caladenia caerulea</i>
,, <i>dentata</i>	,, <i>carnea</i>
<i>Wahlenbergia gracilis.</i>	<i>Cyrtostylis reniformis</i>
Goodeniaceae—	<i>Lyperanthus suaveolens</i>
<i>Dampiera Brownii.</i>	,, <i>nigricans</i>
Myrsinaceae—	<i>Pterostylis pedunculata</i>
<i>Myrsine variabilis.</i>	,, <i>concinna</i>
Scrophularineae—	,, <i>curta</i>
<i>Euphrasia speciosa.</i>	,, <i>reflexa.</i>
Bignoniaceae—	Liliaceae—
<i>Tecoma australis.</i>	<i>Stypandra umbellata</i>
	,, <i>glauca.</i>
